silver.eShop

Release notes 3.4

Inhaltsverzeichnis

silver.eShop version 3.4

- supported eZ Version 5.4.5

> If you apply this silver.eShop version in the project, always check the latest tagged version.

Server requirements

silver.eShop relies on eZ Publish software that is built to rely on existing technologies and standards, mainly:

- PHP scripting language: 5.4/5.5, minimum 5.4.4, & community support for 5.6
- SQL database: *MySql/MariaDB or PostgreSQL*
- Web Server: Apache 2.2, Apache 2.4 or Nginx 1.4+
- Java JRE 1.7 (Oracle-Sun/OpenJDK) when Solr is used (for use with eZ Find search engine)

New features and improvements

List of new features and improvements.

Ticket	Topic	Description	Usage
#11897	Breadcrumbs	Complete solution for breadcrumbs generation	Documentation page for Breadcrumbs **Please note!** Due to the change of the router implementation in the last release, the request attribute 'silverModule' is not set by the router any longer. The missing attribute was fixed during the development of the breadcrumbs and the controller-action SilversolutionsEshopBundle:SilverModule:loadController creates this attribute, now. If in a project, some code relies on the existence of this attribute before or without that controller is invoked, it has to be changed, accordingly.
#12296	Price Engine	Events for price requests and price request lines	New events: • siso_price.price_line_request • siso_price.price_request Price Engine - Cookbook#Cookbook-HowtopassadditionalinformationtopriceRequestfromcatalogElement
#12429	AJAX / Phalanx	Overriding of AjaxControllers in the project	The order of Bundles which override Phalanx actions has been changed. Before, the Bundle which was registered **first**, was the prioritized Bundle for the definition of Phalanx AJAX actions. Since this release, the **last** registered Bundle, which defines a Phalanx AJAX action, would be the one who "wins". This way it's conform to other Bundle resource loading processes. Projects which redefined standard AJAX controllers must take this into consideration in their EzPublishKernel configuration.

Bug fixes

List of bugs that were fixed in this version.

Ticket	Topic	Description
#12460	Basket	Fix for basket status and messages in event listeners

Ticket	Topic	Description
#12477		
#11938	Checkout	Fixed: German texts in English order confirmation email
#12472	Basket	Basket price calculation handle variants correctly
#12429	Ajax	It was not possible to override AjaxControllers in the project

Tagged versions

List of tagged versions. These tags are created in the next development phase - 3.4++.
This list must be fulfilled when the next release was published.

silver.eShop

Ticket	Topic	Description	Date	Tag	Patch
#1234	Example	fixed a bug	23-02-15	3.1-1234	hotfix-3.1-1-1234.patch

silver.customercenter

Ticket	Topic	Description	Date	Tag	Patch
#1234	Example	fixed a bug	23-02-15	3.1-1234	hotfix-3.1-1-1234.patch

silver.orderhistory

Ticket	Topic	Description	Date	Tag	Patch
#1234	Example	fixed a bug	23-02-15	3.1-1234	hotfix-3.1-1-1234.patch

API Changes

silver.eShop

Database changes

Update doctrine

```
php ezpublish/console doctrine:schema:update --force
```

Services

vendor/silversolutions/silver.e-shop/src/Silversolutions/Bundle/EshopBundle/Services/Catalog/CatalogService.php
New constructor parameter

Code Block 1 vendor/silversolutions/silver.e-shop/src/Silversolutions/Bundle/EshopBundle/Resources/config/ses_services.xml

```xml
        <!-- catalog service -->
        <service id="silver_catalog.catalog_service"
 class="%silver_catalog.catalog_service.class%">
            <argument type="service" id="silver_catalog.data_provider_service" />
            <argument type="service" id="siso_price.price_service.chain" />
            <argument type="service" id="siso_price.price_factory.standard" />
            <argument type="service" id="silver_customer.customer_service" />
            <argument type="service" id="ses.customer_profile_data.ez_erp" />
            <argument type="service" id="silver_common.logger" />
            <argument type="service" id="silver_catalog.variant_service" />
            <argument type="service" id="silver_common.navigation" on-
invalid="ignore"/>
+           <argument type="service" id="event_dispatcher" />
        </service>
```

vendor/silversolutions/silver.e-shop/src/Silversolutions/Bundle/EshopBundle/Service/NavigationHelper.php
Removed method

```
-   /**
-       * returns true if product catalog is enabled
-       *
-       * @return bool
-       *
-       */
-     public function doesNavigationContainCatalog()
-     {
-         return (bool) $this->catalogHelper->isProductCatalogEnabled();
-     }
```

vendor/silversolutions/silver.e-shop/src/Silversolutions/Bundle/EshopBundle/Service/CatalogHelper.php
New public method

```
+    /**
+     * fetches the parent product catalog element for the given catalog element
+     *
+     * @param CatalogElement $catalogElement
+     * @return int|null
+     */
+    public function getParentProductCatalog(CatalogElement $catalogElement)
+    {
+        ...
+    }
```

Templates

New templates

Wishlist and stored basket are separated now
- vendor/silversolutions/silver.e-shop/src/Silversolutions/Bundle/EshopBundle/Resources/views/Basket/show_stored_basket_part.html.twig
- vendor/silversolutions/silver.e-shop/src/Silversolutions/Bundle/EshopBundle/Resources/views/Basket/show_stored_basket_part.html.twig

Changed templates

To include new breadcrumbs solution some templates need to be adjusted:
Remove the empty breadcrumb block in following templates:
- vendor/silversolutions/silver.e-shop/src/Silversolutions/Bundle/EshopBundle/Resources/views/Basket/show.html.twig
- vendor/silversolutions/silver.e-shop/src/Silversolutions/Bundle/EshopBundle/Resources/views/Basket/show_stored_basket.html.twig
- vendor/silversolutions/silver.e-shop/src/Silversolutions/Bundle/EshopBundle/Resources/views/Comparison/comparison_list.html.twig
- vendor/silversolutions/silver.e-shop/src/Silversolutions/Bundle/EshopBundle/Resources/views/Forms/register_base.html.twig
- vendor/silversolutions/silver.e-shop/src/Silversolutions/Bundle/EshopBundle/Resources/views/QuickOrder/quick_order.html.twig
- vendor/silversolutions/silver.e-shop/src/Silversolutions/Bundle/EshopBundle/Resources/views/Search/search.html.twig
- vendor/silversolutions/silver.e-shop/src/Silversolutions/Bundle/EshopBundle/Resources/views/details.html.twig

```
{% extends "SilversolutionsEshopBundle::pagelayout.html.twig"|st_resolve_template %}
- {% block breadcrumb %}{% endblock %}
```

Modify the pagelayout:

Code Block 2 pagelayout.html.twig

```
{% block breadcrumb %}
        <div class="crumb-wrap hide-for-print">
          <div class="row">
            <div class="columns">
-             {{
include('SilversolutionsEshopBundle:Catalog/Navigation:breadcrumb.html.twig'|st_resol
ve_template) }}
+             {%
render(controller('SilversolutionsEshopBundle:Breadcrumbs:renderBreadcrumbs')) %}
            </div>
          </div>
        </div>
{% endblock %}
```

Vendor bundles + config

For new breadcrumbs we need to add a vendor bundle.
Please execute the command from root

```
php composer.phar require whiteoctober/breadcrumbs-bundle ~1.0.1
```

silver.orderhistory

Follow these changes only, if you are using Orderhistory in your project.

- no changes
  silver.customercenter

Follow these changes only, if you are using Customercenter in your project.

Hotfixes
