2.6. Hotfixes	17

1. silver.e-shop version 3.7

- intermediate version
- supported eZ Version 5.4.12

If you apply this silver.e-shop version in the project, always check the latest tagged version.

1.1. Server requirements

silver.e-shop relies on eZ Publish software that is built to rely on existing technologies and standards, mainly:

- PHP scripting language: 7.x
- SQL database: *MySql/MariaDB or PostgreSQL*
- Web Server: Apache 2.2, Apache 2.4 or Nginx 1.4+
- Java JRE (Oracle-Sun/OpenJDK) when Solr is used (for use with eZ Find search engine)
- Symfony 2.7

1.2. New features and improvements

List of new features and improvements.

Ticket	Topic	Description
#16273	Checkout	GDPR adaptation: No checkbox, only textmodule for privacy policy in checkout
#16061	Log search requests	Due to the GDPR regulations the suser id will be not stored any more in search logs. New parameter siso_core.default.gdpr.store_user_id_for_search: false
#16274	Contact form	GDPR adaptation: Add textmodule for privacy policy in contact form
#15097	Product images	No subfolder for assets The parameters subFolders was set to 0 in the config to ensure that images and assets stored in the corresponding folders are fetched by default
#14870	toggle price	Fixed issue with bestseller boxes, price were not toggled
#15956	Data validation	Added possibility to use ZipValidator also for message objects, instead of only silver.eShop forms.

1.3. Bug fixes

List of bugs that were fixed in this version.

Ticket	Topic	Description
#14764	TranslationService	<ul style="list-style-type: none"> - The siteaccess is almost ignored in a specific situation. - No fallback language will be used if a siteaccess is defined.
#14356	Legacy operator to display the orders of the users	<p>Legacy operator: <i>ses_request_parameters("post")</i></p> <p>Method used in the backend, in the tab orders of each user. The functionality of update orders was not working as it should.</p>
#14849	BusinessRegistration vat number required for the world	VAT number is not required any more for all the countries but for EU countries
#15163	Quickorder CSV drag & drop not working	
#15209	OrderHistory	The details fields were not consider per siteaccess
#15023	Serializing of catalogElement	Issue with toHash() fromHash() method in the PriceField
#15214	Quickorder	When checkbox 'remove' was checked, product was added to quickorder
#15403 #14949	eContent and eZ Catalog data provider	Unset variable \$realSkulList caused an exception
#15138	Search	If the product exists in several locations, only main location should be considered
#15925	Prefix search for full text	Prefix can be used to search if enabled
#15944	Basket	Rename Typo in name of method <code>remoteFromRemoteDataMap</code> in class <code>BasketLine</code>
#15286	Administration / Order Management	Allow for past dates in date filter
#15010	Administration / silver.eShop cockpit	Remove not working update buttons

#15621	Catalog	Better exception handling in DEV mode for currently ignored errors
#16602	Orderhistory - Typehinting	Orderhistory uses wrong typehinting - using CURLTransport causes issues

1.4. New plugins

no change

Tagged versions

no change

1.4.1.silver.e-shop

no change

1.4.2.silver.customercenter

no change

1.4.3.silver.orderhistory

no change

1.5. JavaScript libraries and plugins

no change

2. API Changes

2.1. silver.e-shop

2.1.1. Database changes

Update doctrine

```
php ezpublish/console doctrine:schema:update --force
```

2.1.2. Configuration

no change

2.1.3. Classes

no change

2.1.4. Services

no change

2.1.5. Method signature changes

Code Block 1 Silversolutions/Bundle/EshopBundle/Entity/BasketLine

```
diff --git a/src/Silversolutions/Bundle/EshopBundle/Entity/BasketLine.php b/src/Silversolutions/Bundle/EshopBundle/Entity/BasketLine.php
index 01b5a7173..29f93e672
--- a/src/Silversolutions/Bundle/EshopBundle/Entity/BasketLine.php
+++ b/src/Silversolutions/Bundle/EshopBundle/Entity/BasketLine.php
-     public function remoteFromRemoteDataMap($key)
+     public function removeFromRemoteDataMap($key)
```

2.1.6. Interface changes

no change

2.1.7. Deprecated content

no change

2.1.8.Ez legacy changes and files/settings ignored by .git

no change

2.1.9.Templates

Legacy operator to display the orders of the users

Code Block 2 src/Silversolutions/Bundle/EshopBundle/Resources/views/Admin/
orders.html.twig
